

Taokui LI | Civil Engineering Postgraduate

Location: Kai Feng, CHINA

Telephone: (+86) 189 0378 1578

Email: taokuili2-c@my.cityu.edu.hk

Github: <https://github.com/LiTaokui>

Core Skills

- Civil Engineering
- SHM
- Structural Vibration
- ML/DL
- Computer Vision
- Research Analysis

Education

MSc

Civil Engineering (Distinction, GPA: 3.59/4.00)

City University of HONG KONG (Sep. 2022 – Aug. 2022)

Thesis: “Structural Damage Detection based on ANNs”.

Modules: Modern Structural Engineering; Methods of Analysis in Civil Engineering and Engineering Mechanics; Transportation and Land Planning; Virtual Design and Construction; Geomechanics.

BEng

Civil Engineering (GPA: 3.42/4.00)

Henan University (Sep. 2016 – June 2020)

Thesis: “Design of a Simply Supported Beam Bridge”.

Modules: Structural Mechanics; Theoretical Mechanics; Material Mechanics; Soil Mechanics; Elastic Mechanics; Hydro-Mechanics; Bridge Engineering.

Research Experience

July 2021 – Nov. 2021

Engineering decision-making and risk analysis

University of Illinois Urbana-Champaign(online)

Outline

Direct a team of 2 fellow students to analyze and predict the occurrence of hotel fire in Foshan by establishing a Bayesian network model.

Key Responsibilities

- Employ analyses, inclusive of data collection of six factors causing fire, and classifying them into three categories, including men-made factors, natural factors and objective factors, to establish a three-layer Bayesian network model.
- Produce comprehensive reports on analysis of hotel fire and reduction in fire losses.

Additional Information

IT Skills:

MATLAB, ANSYS, Python including Pytorch and TF.

Others:

Familiar with SVM, K-MEAN, MCMC, RNN, CNN and other Machine Learning/ Deep Learning algorithms. Good mathematical foundation in linear algebra and probabilities
